Subject: CFAC, Flathead River Bank stabilization

Nicoll,

The agencies appreciate the expedited effort to stabilize the Flathead river bank in the vicinity of the South percolation ponds.

In order to stabilize the river bank as per the approved work plan, it may be necessary to temporally dewater some excavated areas before placing the sized backfill. The contractor can dewater into the East end of the South Percolation ponds, as needed.

Please contact Steve Wright, Colleen Owen, or myself if you have any questions.

Thank you.

Dick Sloan
